

Okada Manila – The Best Integrated Resort Attractions

Okada Manila, located within the heart of Manila, Philippines, is a landmark of luxury that represents the pinnacle of hospitality, design, and guest experience in the Asia-Pacific region. Since its grand opening in December 2016, the property has been recognized as the Philippines' most illustrious integrated resort.

Acclaimed as “Manila’s Grand Icon,” it takes pride in its fusion of world-class facilities and exemplary service — a testament to the fine blend of Japanese hospitality and Filipino warmth. Okada Manila has again been recognized by the Forbes Travel Guide, receiving its 4th consecutive Forbes 5-star rating in 2023. This recognition cements its status as a destination par excellence.

Beyond its accolades, Okada Manila is renowned for providing a spectacular guest experience, offering a wonderful stay at any of its 993 luxurious rooms; a spectacular gaming experience at its sprawling casino floor with over 3,000 gaming machines and electronic table games; a gastronomical journey with the property’s 17 diverse dining options led by world-class chefs; and a sprawling retail space showcasing premium brands, perfect for a day of shopping.

To provide an even more exceptional experience, Okada Manila has added attractions to captivate guests and provide them a memorable stay. The most iconic attractions to date are The Fountain, one of the world’s grandest multicolor dancing water fountains and Cove Manila, Southeast Asia’s biggest indoor beach club. To add a visual and sensorial spectacle, Okada Manila has jazzed up its entertainment scene with its Okada Manila Entertainment Group (OMEG).

The Fountain: A World-Class Marvel

As one of the country's grandest destinations, Okada Manila prides itself in serving up larger-than-life experiences, with The Fountain as its crown jewel. This \$30-million extraordinary feature offers a breathtaking show of artistically choreographed water, light and music performances that can rival those of Dubai's Burj Khalifa and Las Vegas' Bellagio. Measuring 37,464 sqm, which is equivalent to 50 Olympic-size swimming pools, The Fountain is equipped with cutting-edge underwater robots, over two-thousand dazzling lights, dozens of high-fidelity speakers, and more than 700 high-power jets that can shoot water that surpasses the height of Okada Manila's 19-storey building, as well as showcases projections during stunning water shows. Designed to provide a unique venue for special events and concerts, installed in The Fountain's lake is an invisible performance stage that allows artists to seemingly walk on water during performances, interacting with the water feature.
